

ACCUBIN™

INVENTORY MANAGEMENT

MONITOR ANYTIME. ANYWHERE.

Proactively manage inventory data from anywhere with cellular service, access to Wi-Fi, or Bluetooth capability using your desktop, tablet, or smart phone. AccuBin™ provides access to all your critical inventory data through the web browser or mobile App (Android and iOS). This unique, cloud-based inventory management tool provides remote visibility to view inventory levels at the click of a button.

ACCOUNT FOR MATERIAL LOSS

Inventory reconciliation is made easy through AccuBin™ user-specific notifications. Inventory levels at your fingertips allow you to reconcile inventory quickly and efficiently to keep your facility on the right track. With AccuBin™, you can address material loss concerns daily, rather than monthly.

STREAMLINE DELIVERIES

Analyzing inventory history and using a patented software algorithm, AccuBin™ accurately predicts when vessels are going to be empty. Similar to traffic lights, color-coded indicators are clearly defined for normal, warning and critical levels. This allows you to optimize deliveries and avoid costly expedites. Receive real-time confirmation when and where deliveries take place at your site. These features allow you to streamline your delivery schedule and meet production needs.

INVENTORY MANAGEMENT FOR CEMENT

AccuBin™ is a comprehensive, cloud-based, inventory management system that allows you to remotely monitor inventory through a user-friendly dashboard. This software provides a secure platform to view both real-time and historical trends in your inventory data. AccuBin™ is designed to eliminate the stress and guess work out of bulk solid inventory management.
