

NAVI Notify™ Wireless Industrial System Alarms

Fact: Essential Systems Fail.

What you need to know. When you need to know it.

When it's your job to make sure nothing goes wrong, and it does, don't be the last to know.

NAVI Notify™

NAVI Notify™ is a self-contained wireless monitoring and notification system designed to provide immediate status, fault, and failure alerts to facility stakeholders and maintenance personnel minimizing the consequences of system failures and downtime. The NAVI Notify™ Industrial system alarm provides simple, secure, reliable monitoring and notification of equipment status, faults and failures.

Simple.

Self-contained NEMA 4X enclosure. Easily set up and configured. Supports standard sensors, transducers, and VFD or control panel relays. Mount it. Wire it. Enter alarm notifications. Your customers are covered.

Secure.

Pre-activated 4G LTE private APN cell-data network and cloud services. No carrier plans to deal with. Isolated from the public internet and independent of building networks, IT requirements, and the complexity of building management systems.

Reliable.

Continuous, battery-backed monitoring and notification. ISO 9001 certified IIoT edge processing and cloud services technology monitoring 25,000 sites globally.

NAVI Solutions' Notify™ Industrial Systems Alarm reduces the risk and consequence of equipment failures and unplanned downtime for facility operators. NAVI Solutions is a provider of commercial and industrial wireless solutions and services for Industrial systems and building equipment.

Digital (dry contact)/Analog connections	12/1
Ethernet/Serial connections (RS232 or RS485/422)	2/2
Relay outputs	1
Outbound notifications text/email	10/10

NAVI Notify™ - Inexpensive Insurance against the consequences of Equipment Failure and Downtime.

NAVI Notify™ Wireless Industrial System Alarms

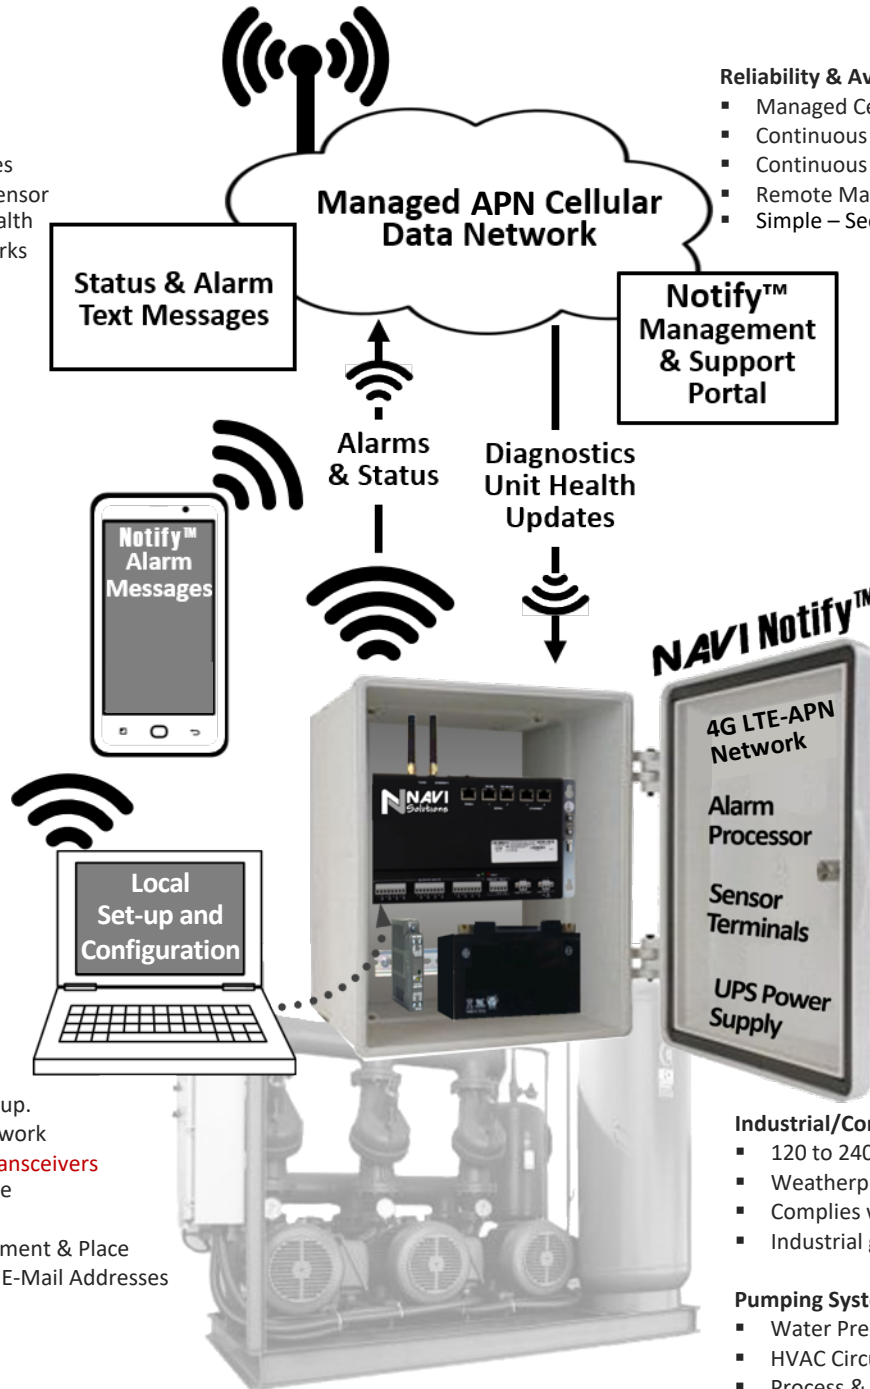

NAVI Notify™

Cellular Pumping System Alarms

- Real-time alarm monitoring
- Delivers specific alarm messages
- Up to 12 digital and 1 analog sensor
- Monitors system status and health
- Independent of building networks
- Immediate direct notifications
- Local and remote management

Reliability & Availability

- Managed Cellular APN Data Network
- Continuous connectivity monitoring
- Continuous unit health monitoring
- Remote Management & Support
- Simple – Secure – Reliable

Installation & Set-up

- Flexible mounting options
- Wireless – No cables. No IT set-up.
- Pre-activated APN cell data network
- **Supports standard sensors & transceivers**
- Connects to pump power source
- Configuration
 - Enter Specific Alarm, Equipment & Place
 - Enter Cell Phone numbers, E-Mail Addresses

Pump System Status Monitoring:

- Loss-of-Power
- Suction & Discharge Pressure
- Fluid Temperature
- Flow Rate Monitoring
- High & Low Tank Level
- VFD Relay Outputs

Pump System Health Monitoring:

- Motor Vibration
- Motor Temperature
- Fluid/Fuel/Oil Presence

Industrial/Commercial Environments

- 120 to 240 VAC or 240 to 480 VAC
- Weatherproof NEMA 4X Enclosure
- Complies with IIoT standards
- Industrial grade components

Pumping Systems

- Water Pressure Boosters
- HVAC Circulation Systems
- Process & Heat Exchange Systems
- Condensate & Boiler Feed Systems
- Water & Wastewater Systems
- Sump & Sewage systems
- Fuel Oil Delivery Systems

NAVI Notify™ - What you need to know. When you need to know it.

Simple – Secure - Reliable
